```
% % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % %
%                                                                        %
% File:      kayardild_deponents_theorem.pdf                             %
% Purpose: Theorem dumps from the file kayardild.dtr.                    %
%           These theorems show the case forms for the Kayardild         %
%           noun malaa 'sea', and the verbs marutha 'put', mariija       %
%           'be put', waalutha 'drive away' and janija 'look for'.       %
%           Note that <mor word tam act> has the value 'undefined'       %
%           for the noun malaa 'sea', but that actual TAM is             %
%           correctly predicted to be possible when licensed by          %
%           the presence of verbal case. Contrast this with the          %
%           verbs, where the ordinary cases have the value               %
%           'undefined', but the path <mor word tam act> is              %
%           given the correct verbal morphology. Of course, given        %
%           that the morphology can occur across word classes, with      %
%           different morphosyntactic values, the value 'undefined'      %
%           means that the word is not licit if paired with the          %
%           particular morphosyntactic combination on the left-hand      %
%           side.                                                        %
%                                                                        %
% % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % % %
